Heuristyc

Product Licenses Module
Quick Start Guide

Installing the Product Licenses Module and your Customization Package

This guide will help you install and configure the Heuristyc Product Licenses module for Heuristyc customization projects on the client's environment. This is a requirement in order to use the solution developed for your client.
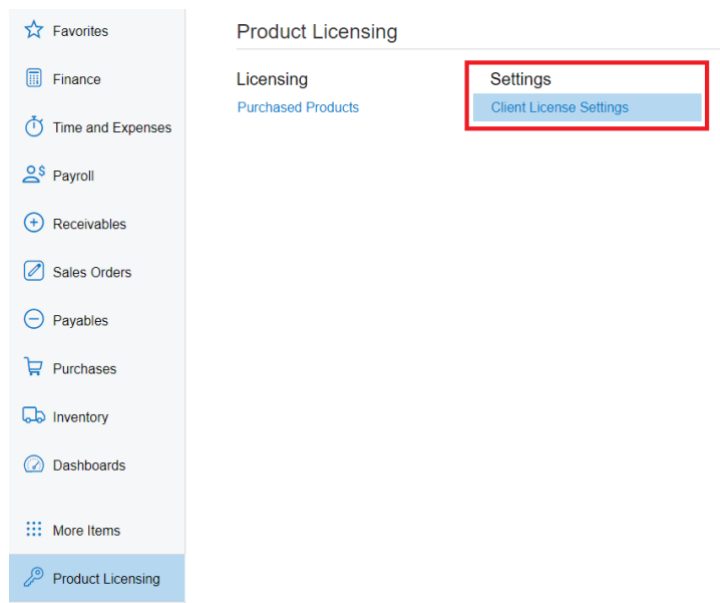

Follow these steps to install the Product Licenses module:

1. In Acumatica, navigate to the **Customization Projects** screen, and load and publish the Heuristyc Product Licenses package that was provided with your customization(s) (e.g., **HC.PK.LIC***[20.219.0021][20R2.01.0001].zip*).

   Note: This package is tailored for your client's Acumatica major version.

2. Load and publish the customization package(s) for the solution developed for your client.

Synchronizing the Licenses

Follow these steps to download and synchronize the authorized licenses for the client:

1. In Acumatica, navigate to **More Items > Configuration: Product Licensing > Settings: Client License Settings**

2. Enter the following information (provided by Heuristyc along with the packages):

   - Customer ID
   - Repository Name
   - Access Key
   - Secret Key

3. Click **Save**.

4. Click the **Validate** button to download and synchronize the license information. You should receive a message indicating that the connection was successful.

5. Navigate to **Product Licensing** > **Licensing: Purchased Products** and confirm that the license was downloaded and is active and valid.
